BOMBARDIER

BOMBARDIER
SKYJET
INTERNATIONAL

“At Skyjet International, we fly to just one schedule – yours.”

THE VISION IS SKYJET INTERNATIONAL

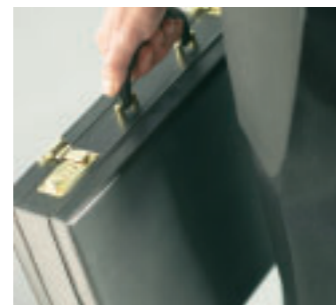

In private aviation, one name continues to innovate, to pioneer, to evolve and to dominate. It has a unique vision for business jet travel in the 21st century and beyond. One which is more accessible, more affordable, with greater reliability, flexibility and comfort. One which knows no boundaries.

The name is Bombardier.

*The vision is Skyjet International.**

While aviation has revolutionised international travel, some have made more of a mark than others. Since it was founded, Bombardier has continued to successfully introduce new technology, push the boundaries of quality and service and bring innovative ideas to market.

Always ready to adapt to changing consumer demands, Bombardier has continued to introduce new industry-leading aircraft and services, becoming one of the world's leading providers of business jet travel solutions. Skyjet International is the next stage in our evolution.

THE SMARTER WAY TO FLY

You're unique. So why not travel the way you choose to, with a service that meets your every need and is able to adapt reliably as these needs change? Taking all that's good about commercial air travel and combining it with the benefits of business jet travel, Skyjet International meets the demands of the modern business and leisure traveller.

By consolidating some of the world's leading charter operators into a single network, Skyjet International provides a variety of innovative private jet travel options, each offering unprecedented access to the world's most extensive fleet of high-performance aircraft as well as uncompromising levels of service, safety and reliability.

BOMBARDIER LEARJET 45

Our fleet features some of the world's fastest aircraft such as the legendary Learjet*, allowing you to save both time and money (as you pay by the hour). And, because our aircraft are unbranded, you fly with the highest levels of discretion and privacy.

With just a single call to one of our dedicated 24-hour operation centres, there's no easier or faster way to co-ordinate your travel arrangements worldwide.

*“Jet Membership:
One card. One network.
Worldwide access.”*

SOLUTIONS AS UNIQUE AS YOU ARE

JET MEMBERSHIP CARD

Our Jet Membership Card is the ideal service to meet the exacting demands of the busy traveller, removing all of the headaches and uncertainties traditionally associated with commercial air travel – rigid schedules, flight delays, airport queues, limited services...

Sold in blocks of 25 annual flying hours, it guarantees the aircraft you want at the time you need it and the service you expect – at a preferential rate. Use these hours anywhere in the world with no penalties for flying in different regions. And because we know life can be unpredictable, unlike any other programme, we allow you to underfly (up to 25%) or overfly (as much as you like) without penalty.

- guaranteed availability (with as little as 8 hours notice)
- total flexibility (no set trip profile or aircraft type – fly to your specific requirements with no complex interchange ratios)
- dedicated Member Services team
- flexible payment terms (pay in advance or make a deposit and pay-as-you-fly)
- access to over 900 aircraft and 5,500 airports worldwide
- preferential 'occupied hours' pricing
- lowest levels of commitment

FREQUENT TRAVELLER

Our Frequent Traveller option is designed for those who require flexible, comfortable and discreet business jet transportation but perhaps don't fly regularly enough to warrant a Jet Membership Card. By simply opening an account with an initial deposit, you can enjoy many of the benefits offered by the Jet Membership Card and use your flying hours whenever and wherever you want over a three-year period.

- freedom to use flying hours over a three-year period
- access to over 5,500 airports worldwide
- access to over 900 aircraft worldwide
- predictable costs (competitive compared to standard charter rates)

AD-HOC CHARTER

For the occasional traveller, our Fixed Price Ad-Hoc Charter service gives you the freedom to create your own itinerary and travel according to your own schedule. As the world's first private jet charter service to offer fixed pricing with no positioning costs, it brings a whole new dimension to international air travel.

- no commitment
- access to over 900 aircraft worldwide
- access to over 5,500 airports worldwide
- fixed pricing with no positioning costs

“Meeting the demands of the modern business and leisure traveller.”

THE SKYJET INTERNATIONAL ADVANTAGE

Whether flying for business or pleasure, to a neighbouring city or halfway round the world, Skyjet International offers the levels of service, performance, speed and safety that you'd expect from Bombardier, the world's leading provider of aviation services.

SUPPORT

Utilising the most advanced flight management and scheduling system, our multilingual team of regional travel experts are on duty 24 hours a day, 7 days a week, 365 days a year to provide you with an unparalleled travel experience – from providing travel advice to booking the aircraft best-suited to you and arranging ground transportation.

TIME

Time is your most valuable asset and you can't afford to waste it sitting in an airport waiting for a connection or your luggage. By accessing local airports, bypassing lengthy airport procedures and avoiding major air traffic, we'll save you time both on the ground and in the air.

TECHNOLOGY

Bombardier is a name synonymous with state-of-the-art technology and every aircraft in the Skyjet International fleet is equipped with the very latest avionics, navigation and communication systems.

SAFETY

We make no compromises when it comes to the safety of our passengers, with standards far exceeding stringent commercial air carrier regulations. Aircraft are routinely inspected and operators regularly audited, while pilots undergo regular training and have unparalleled experience.

SECURITY

In conjunction with FBOs, airport authorities and law enforcement organisations, we insist on a series of rigorous security measures which prevent any unauthorised access to your aircraft. All destinations, routes and passenger lists are carefully screened prior to boarding. And of course, staff confidentiality and discretion is assured at all times.

CONVENIENCE

With aircraft on standby across the globe, you're never far from a Skyjet International plane. Avoiding major air traffic and airport delays you can fly to over 5,500 airports worldwide, many of which are either too remote or inaccessible for standard commercial transport.

CHOICE

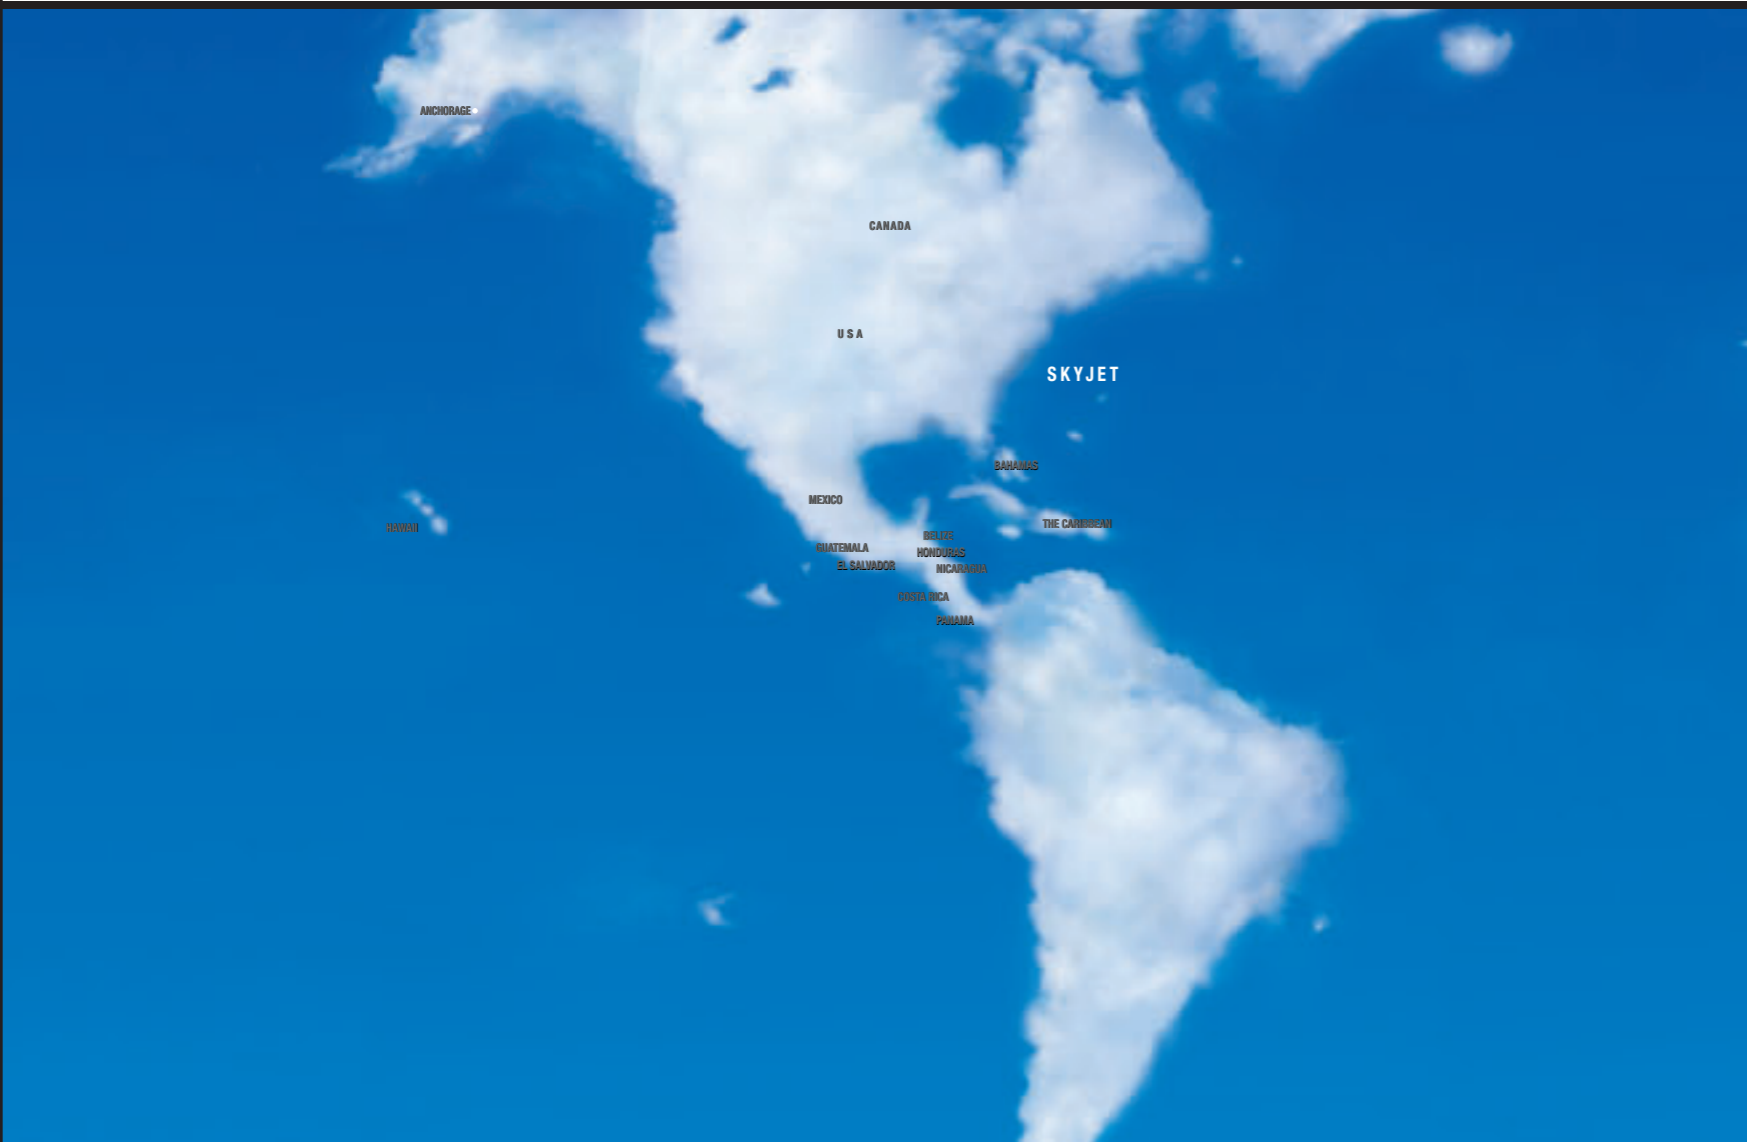

Our global fleet provides access to the most comprehensive range of modern business aircraft currently available to business travellers, equipped with the latest features to meet passenger expectations for performance, safety and comfort.

ASSURANCE

Skyjet International is wholly owned by Bombardier, the world's leading manufacturer of private jets, including the world-renowned Learjet series. From aircraft manufacturing, to pilot training and maintenance, the company has continually set new standards in private aviation.

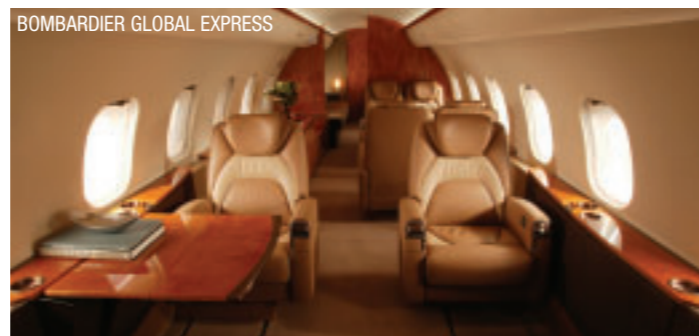

COMFORT

Each Bombardier aircraft is configured specifically to provide you with a spacious, comfortable cabin and a discreet environment in which to work or relax, allowing you to arrive at your destination rested, prepared and focussed.

A WORLD WITHOUT BOUNDARIES

At Skyjet International, we understand that a journey is more than just a flight. It's an experience and one that should be enjoyed and not endured. We know that things like comfort, safety, choice, convenience and privacy are important, so we'll ensure that whether you need to work or rest, you enjoy a comfortable journey and arrive at your destination rested, prepared and ready for the next part of your day.

And to help you, our multilingual team of regional travel experts based in London, Dubai, Hong Kong and Washington, DC are always on standby – 24 hours a day, 7 days a week, 365 days a year – to help you book your travel anywhere in the world.

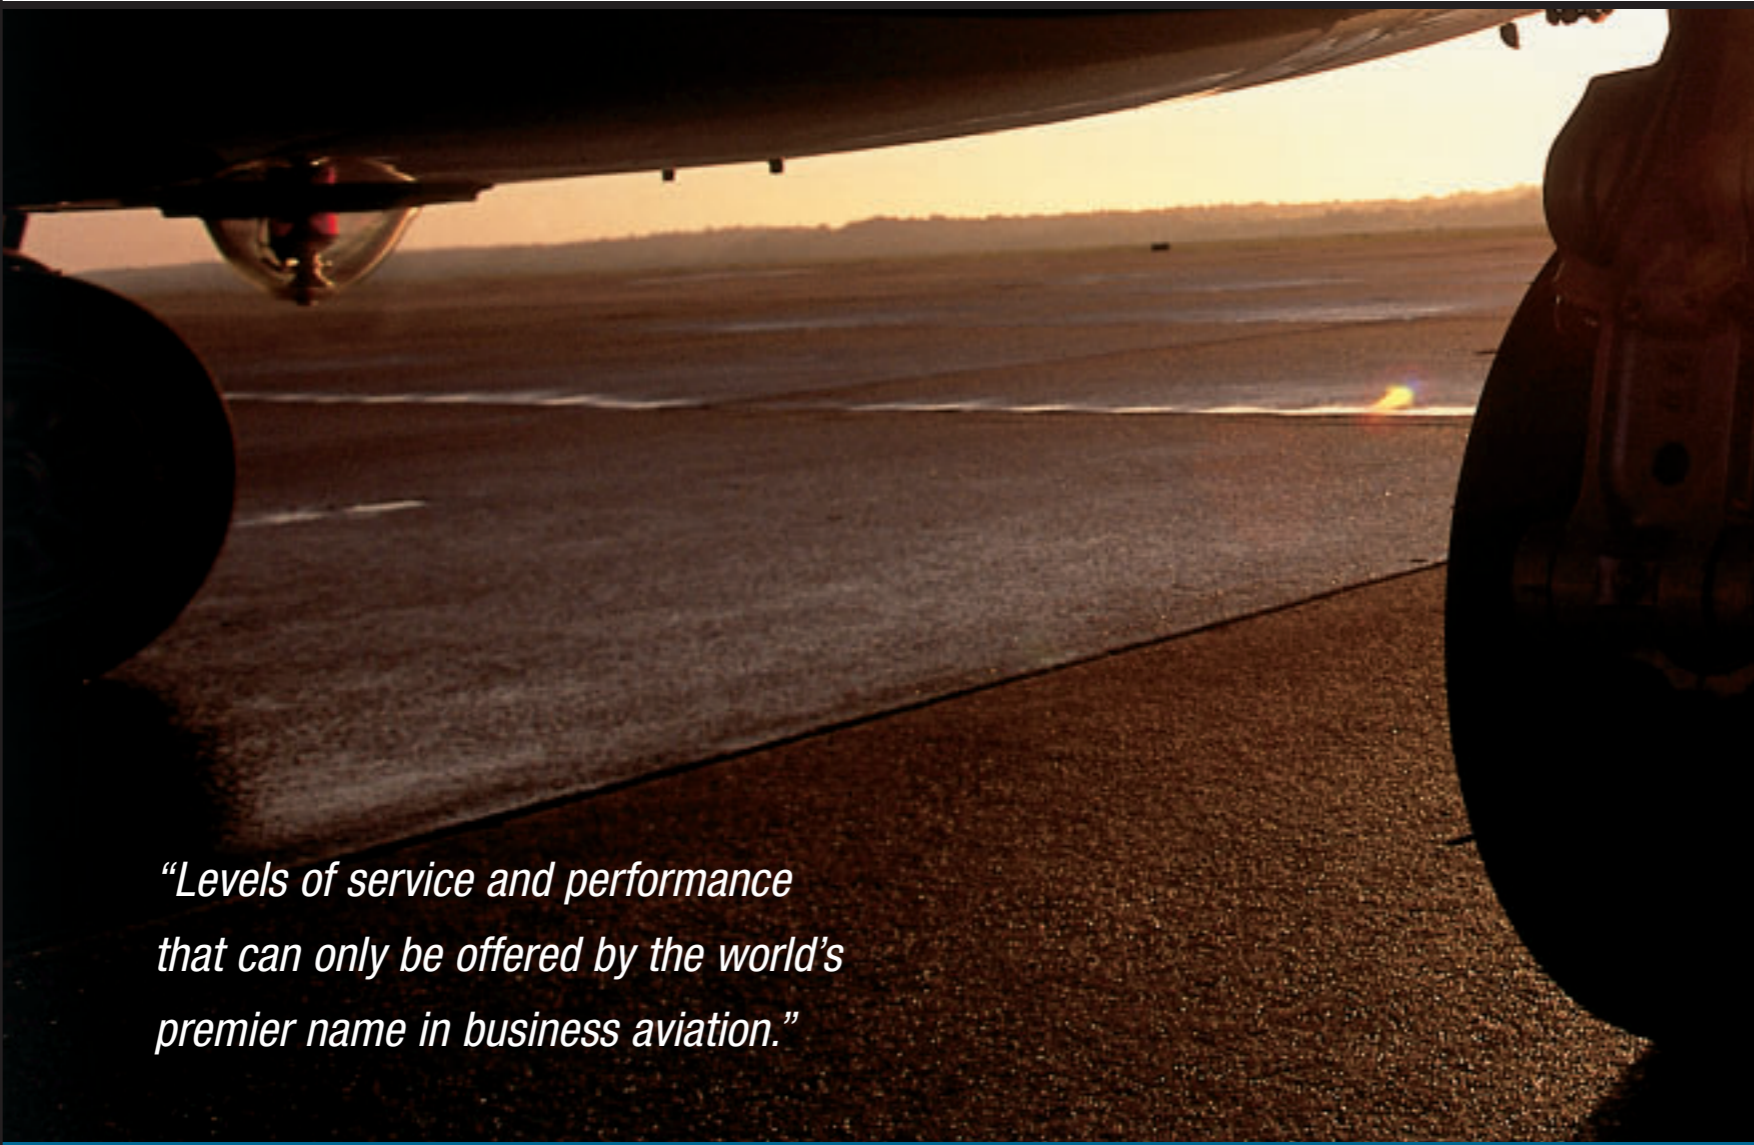

NORTH AMERICA

Bombardier also caters specifically to the North American market through its sister company Skyjet, based in Washington, DC. Founded in 1997 and acquired by Bombardier Aerospace in 2000, Bombardier Skyjet offers a number of options to meet the needs of air travellers. The Skyjet Card provides a choice of 25, 50 or 100 flight hours in a preferred size of aircraft including guaranteed availability and a simple hourly rate which eliminates deadhead costs often associated with one-way travel.

Alternatively, the Learjet and Challenger* Jet Cards offer many of the same benefits and allow customers to specify the use of a particular aircraft model. The company also offers an on-demand charter programme.

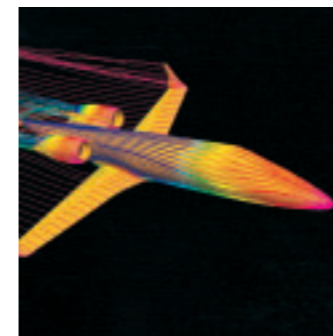

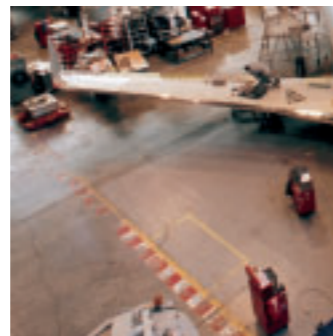

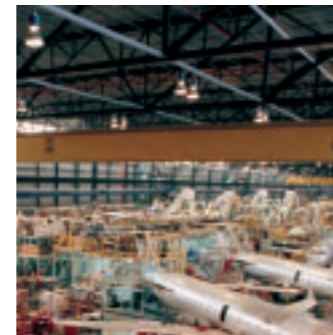

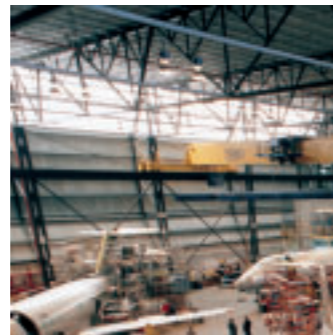

“Levels of service and performance that can only be offered by the world’s premier name in business aviation.”

SUPPORT YOU EXPECT FROM A NAME YOU CAN TRUST

As the only business jet service operated by a leading business aircraft manufacturer – Skyjet International is able to offer an exceptional range of benefits and unique advantages:

- proven experience and expertise drawn from decades of aviation leadership
- unrivalled reputation for meeting passenger demands for comfort, speed, performance and safety
- the most comprehensive range of transportation solutions to meet your ever-changing travel requirements
- access to a network of superior maintenance and pilot training facilities
- the reliability and quality you expect from a market leader
- peace of mind

Leader in the design and manufacture of innovative aircraft – including the Learjet, Challenger and Global Express® families of aircraft – Bombardier Aerospace is the world’s third-largest aircraft manufacturer. A division of Bombardier Inc., it offers a selection of business aviation solutions, technical services, and aircraft maintenance and pilot training programmes.

A world-leading manufacturer of innovative transportation solutions, from regional aircraft and business jets to rail transportation equipment, Bombardier Inc. is a global corporation headquartered in Canada.

“More accessible, more affordable, with greater reliability, flexibility and comfort.”

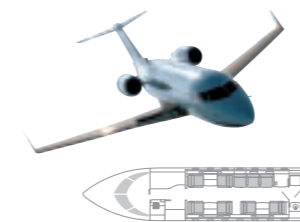

THE FLEET

Our exclusive international network provides guaranteed access to a core fleet of over 900 aircraft, comprising nine Bombardier models which can accommodate even the most demanding of requirements whether flying between continents or across them.

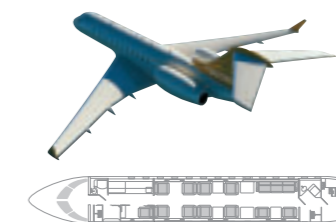

BOMBARDIER LEARJET 45/45XR
